

I have been a member of the XM satellite radio network for a little over a year now. It has provided me with the music and information that is NOT available to me on standard FM and AM stations in my area. I can not see how you can prevent the satellite radio (THAT I PAY FOR!) to broadcast certain subjects. Whether satellite radio discusses local or international events, they have the right under the first amendment to discuss what ever they want to discuss. I pay money for this service and I appreciate the EXCELLENT service they are providing for the United States. There are many more important issues evolving at this time in our country that should be evaluated, . rather then wasting time trying to prevent the broadcasting local events on a private radio network. If you disagree and this discussion is important to you, then I would appreciate a response to this letter. thank you and I appreciate your response. Peter Sandor
